

CONSOLE | DSM7

Everything you need to run
an optimised manufacturing
business in a box.

Specification

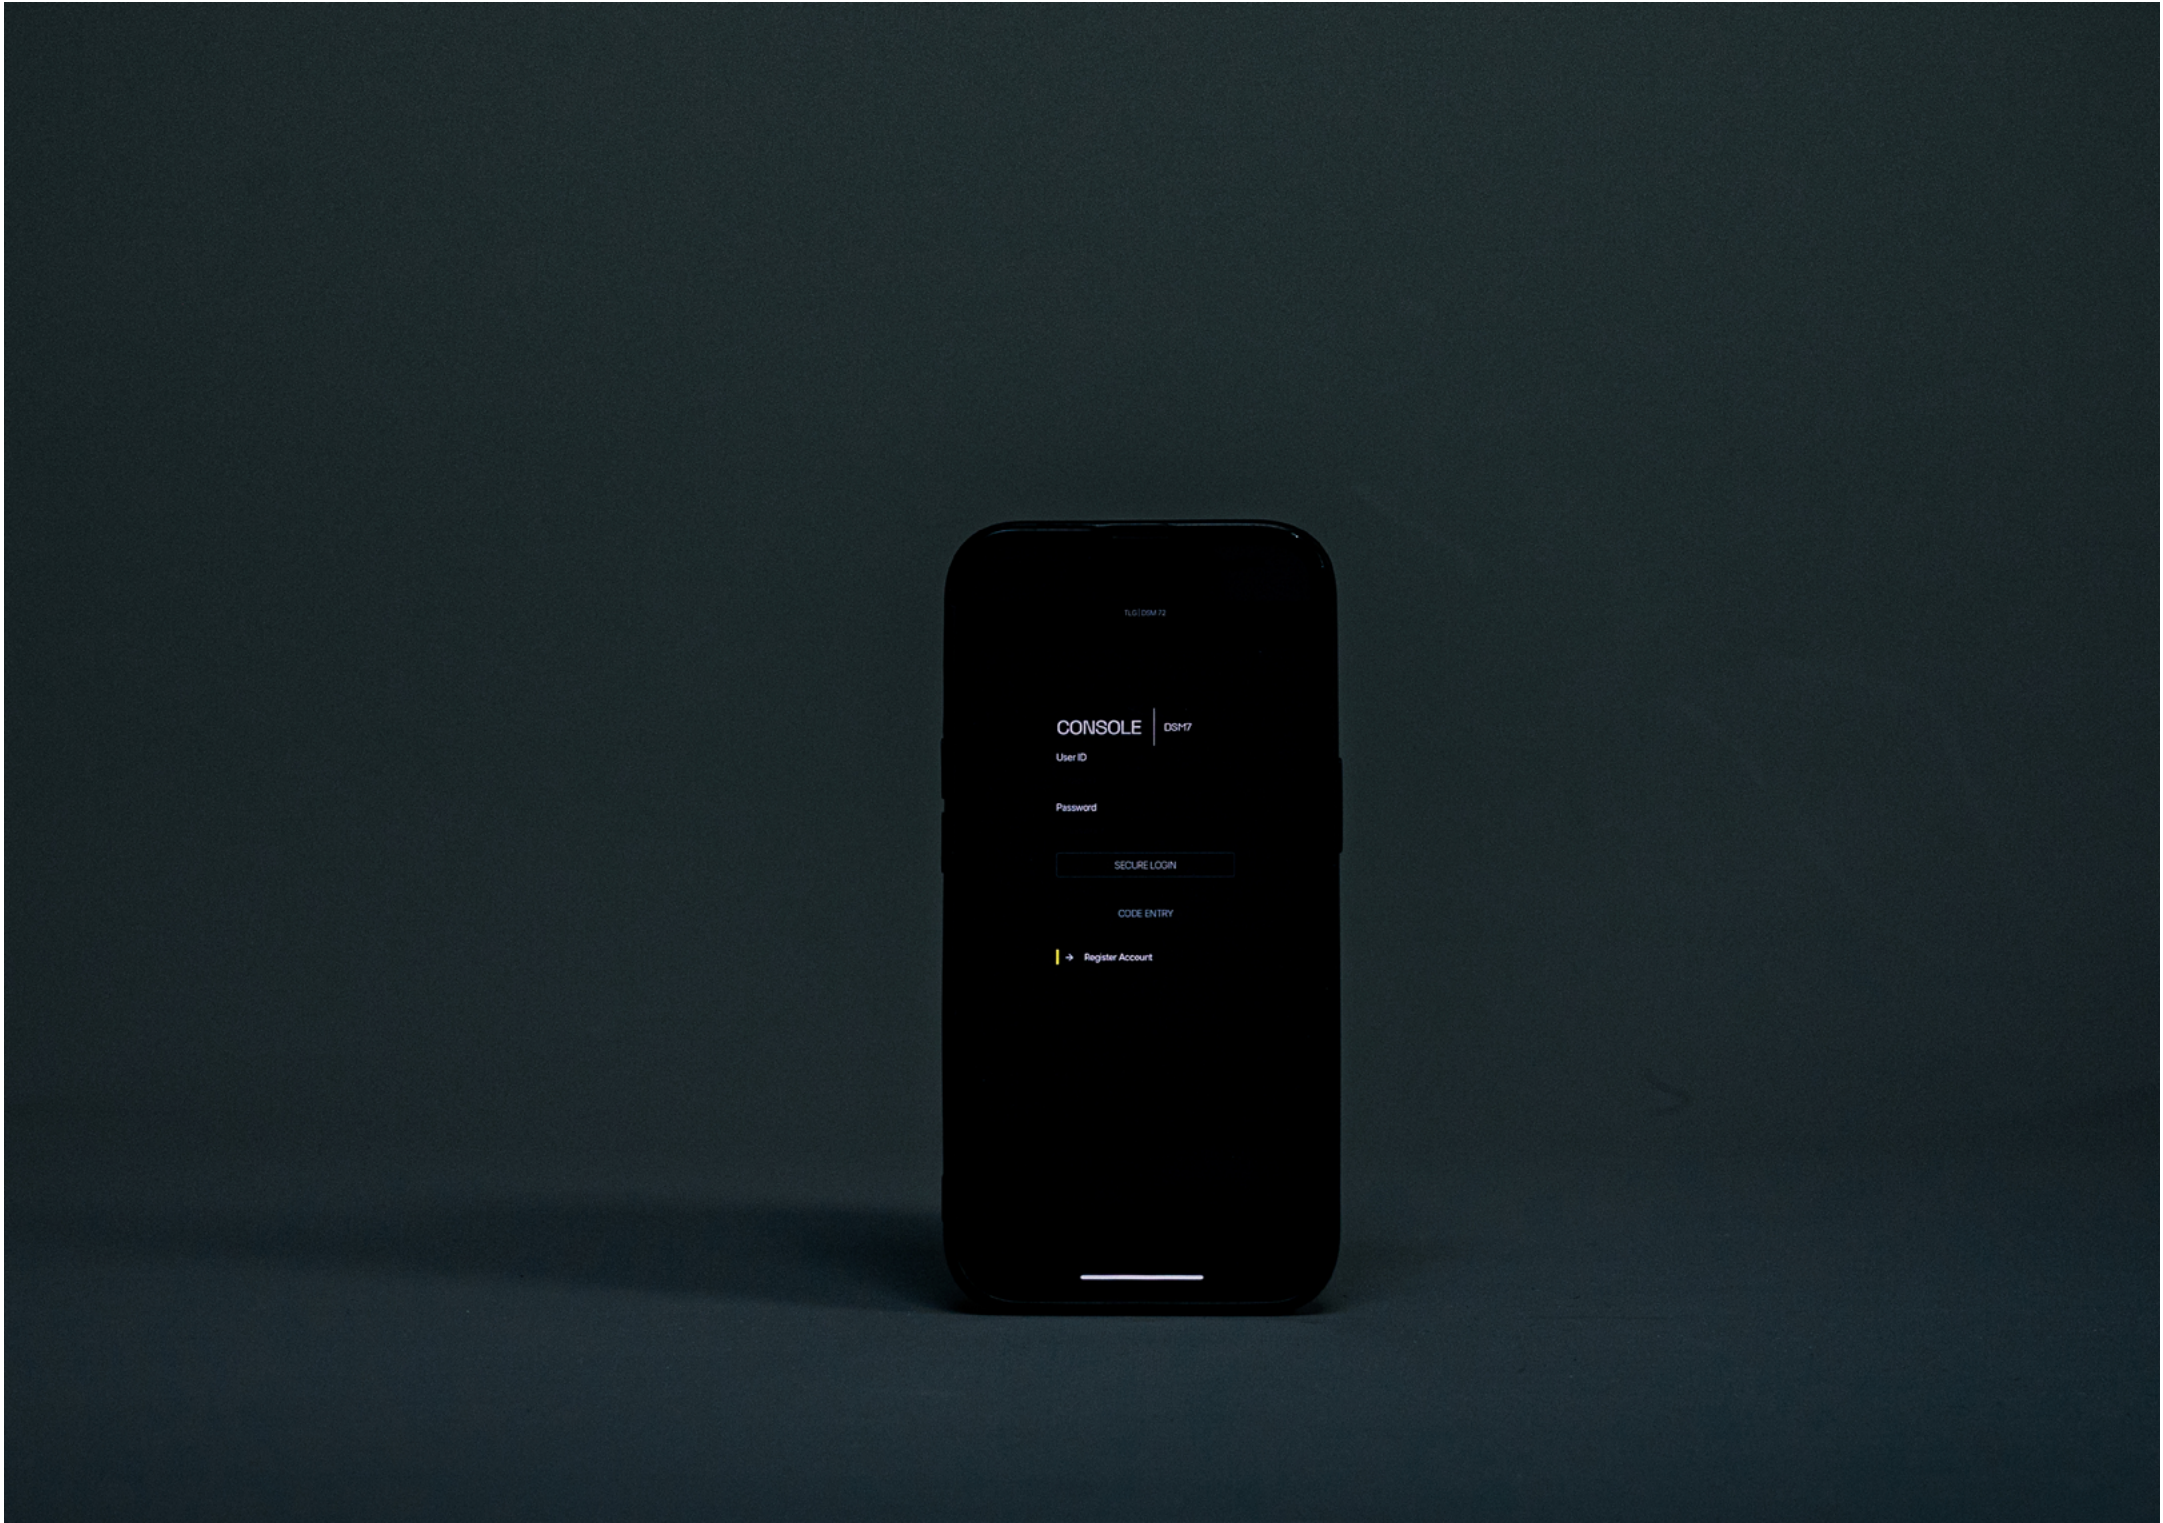

DSM7

Devices & Compatibility

¹ How to Access

Our Platform is accessible over the internet from PC's, TV, to Tablet & handheld devices, providing different viewports designed to meet users where they are, supporting how they work across the operation.

Supported	Integration	Devices
Mac OS	Existing ERP, MR, MES	Desktop & PC
Windows	QA Systems	Laptop
Web (Chrome Recommended)	Spreadsheets	Tablet
	CRM	Smartphone
	Accounting Software	Production Floor TV
	IOT Sensors	

Capabilities

Capability	Description	Virtual Control Centres	Digital Trading Desks
Production Control	Plan jobs, organise production and monitor progress. Help your team understand what needs making, when it needs to be ready and what needs attention.	●	●
Business Data Storage	Keep important business information organised and accessible. Give your team a clearer place to find the information it needs to do its work.	●	●
Inventory & Stock Management	Keep track of materials, components, products and equipment. Understand what's available, what's being used and what may need replenishing.	●	●
Notifications & Human-in-the-Loop	Bring important updates, tasks and decisions to the attention of the right people. Keep people involved when their judgement, approval or action is needed.	●	●
Shop Floor Data Collection	Collect information from the shop floor to understand production activity and progress. Help managers see what's happening as work takes place.	●	●
Internal & External Communications	Help your team share information and communicate with colleagues, customers and suppliers. Keep conversations organised so important details are easier to follow.	●	●
Automated Reporting	Bring business information together into reports with less manual effort. Make it easier to review progress, understand performance and share important updates.	●	●
Logistics Management	Coordinate the movement of materials, products and equipment. Help keep deliveries, movements and logistical activities organised.	●	●
Finance	Keep track of income, costs, budgets and other financial information. Understand where money is going and how the business is performing.	●	●
Analytics	Turn business information into a clearer picture of performance. Identify trends, compare results and see where attention may be needed.	●	●
File Management, Storage & Sharing	Organise and share drawings, documents, images and other business files. Help the right people access the information they need.	●	●
CAD/CAM	Work with computer-aided design and manufacturing information alongside wider business activities. Help connect technical files and product designs with the people and processes involved in making things.	●	●
Find & Sell Products	Discover products, parts, materials, equipment and other things your business needs. Show other companies what you make and give new customers the opportunity to find you.		●
Bid, Negotiate & Agree on Work	Discover opportunities to win work, submit bids and discuss prices, requirements and terms. Help move conversations towards an agreement.		●
Communicate & Make Payments	Communicate with suppliers and customers about products and opportunities. Keep conversations together and use the built-in payment portal to make transactions through the Marketplace.		●
Follow Market Activity	Keep track of activity across the Marketplace. Explore what's available, follow developments and identify potential products, customers and business opportunities.		●

Obsessively designed for the
business people in manufacturing
