

Obsessively designed for the
business people in manufacturing

Pioneering tools for running complex manufacturing
businesses, building long-term security and
executing strategies for growth.

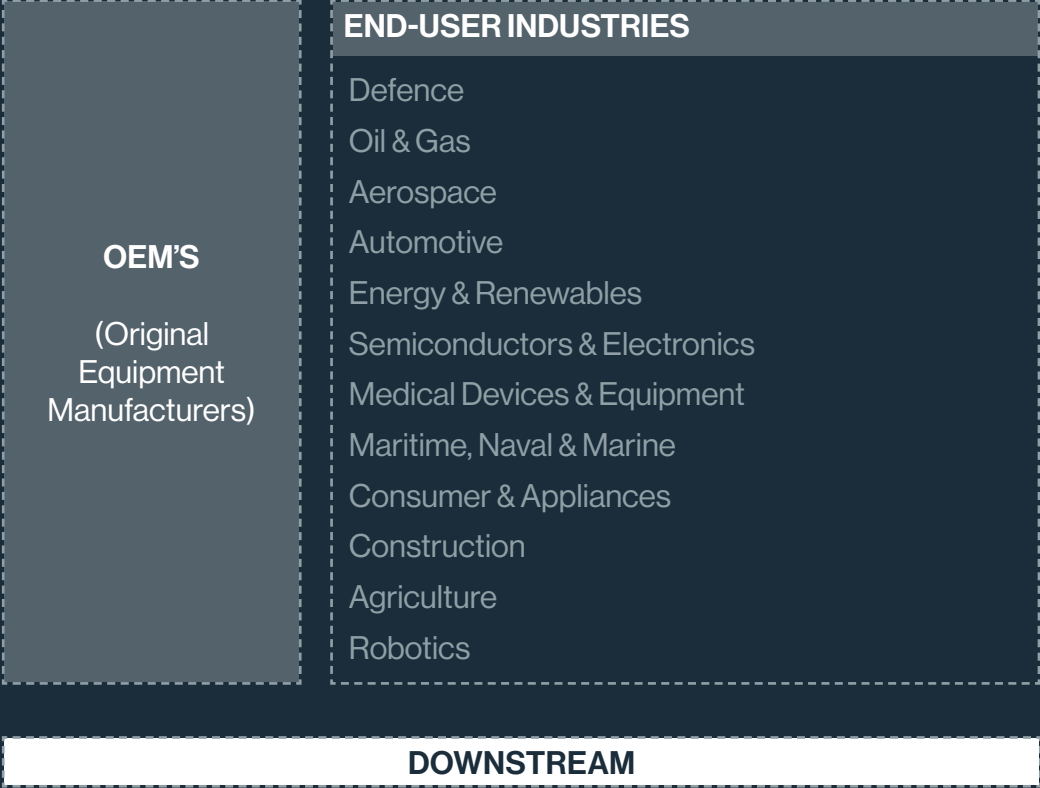

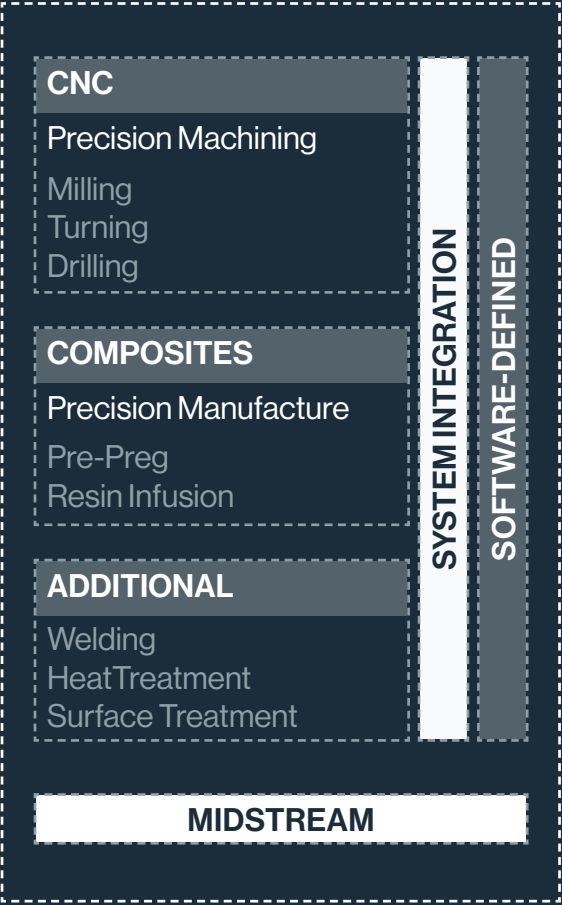

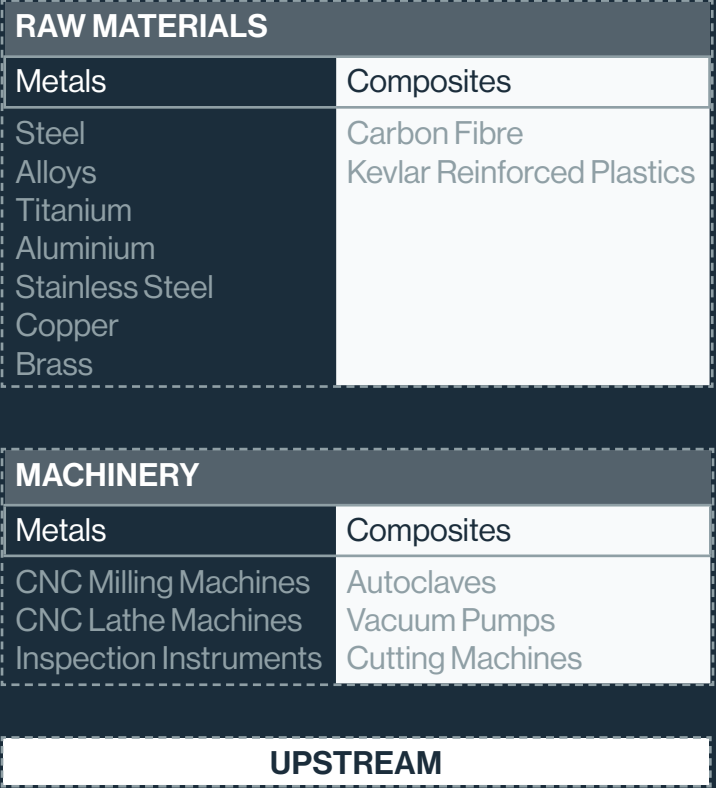

We build products to help companies that make things, sell what they make to more people, and keep their businesses healthy by giving them a way to find new customers and the tools to control everything they do.

1

Our platforms are designed around the value chain of companies that make, move, manage, stock, and sell engineered products.

Built to serve the customers you know,
and the ones you've never heard of

Our products are built to meet the exacting standards
of today's leading OEM's while anticipating the needs
of tomorrow's emerging industries.
At scale and at pace.

For over a decade The Levyne Group has operated as both investor and provider across advanced software and data systems, advanced composites, autonomous systems, artificial intelligence, and defence technology.

¹**The Levyne Group**

A passionate group driven by family values and delivering at the highest levels of technology.

¹ We understand manufacturing not from a distance but from inside performance driven sectors where failure is expensive and delay is unacceptable.

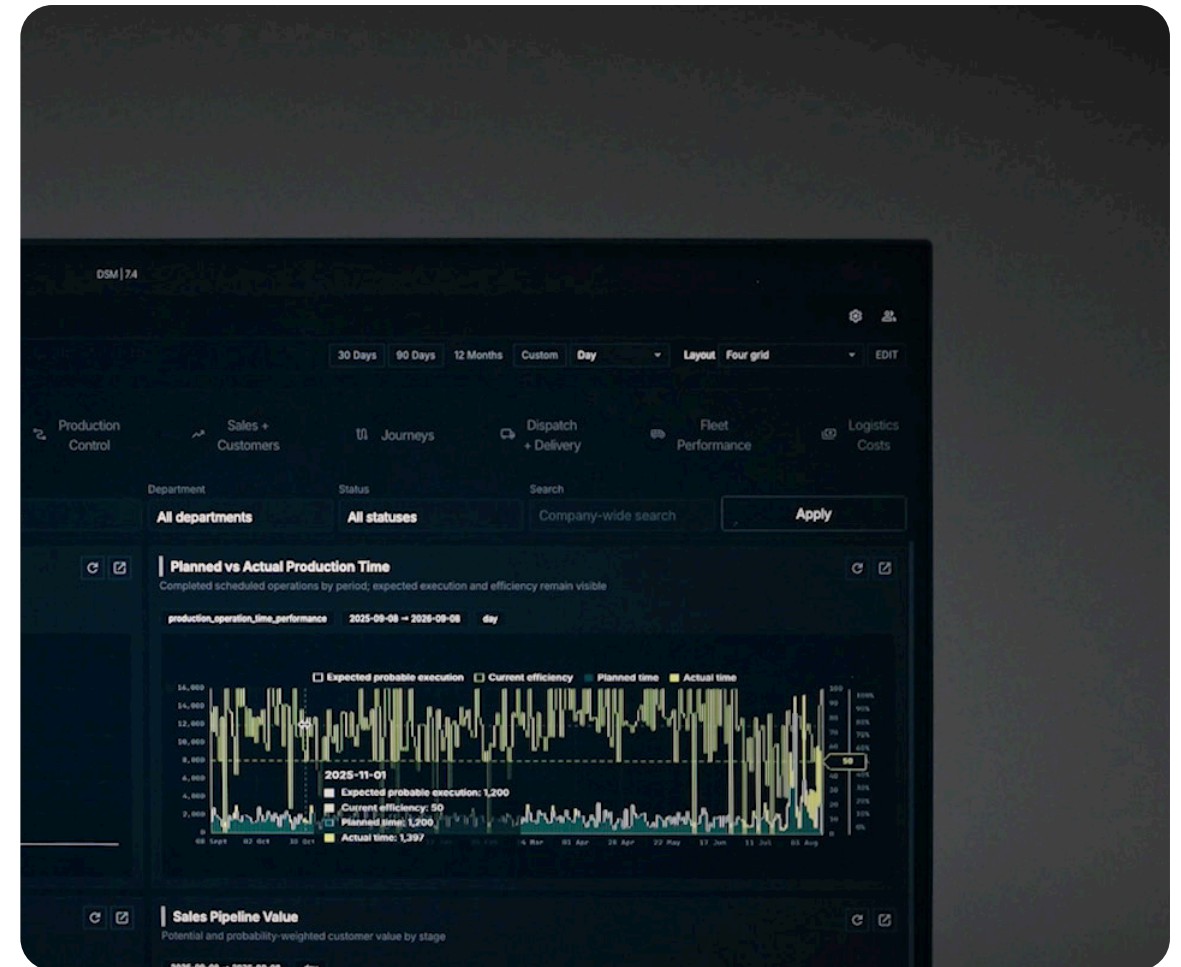

² The next decade of manufacturing will reward organisations capable of compressing decision cycles and integrating intelligence into operations to move faster whilst retaining quality.

³ Administrative drag, disconnected systems, and reactive management will always undermine competitiveness on the global stage. DSM7 is an integrated command environment designed to remove these constraints.

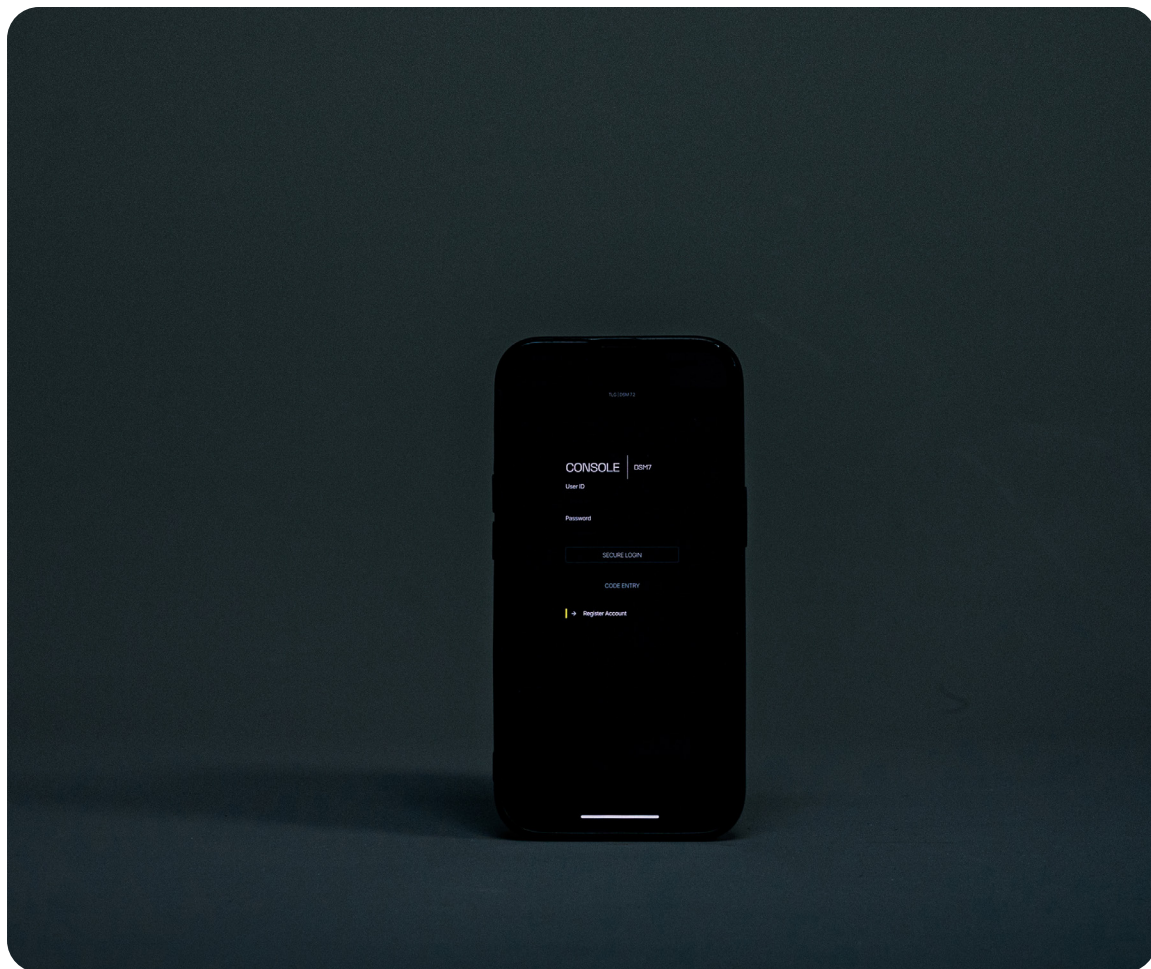

¹ Digital Trading Desks

Discover products, find suppliers and customers, bid for work, negotiate deals, communicate externally, transact and track market activity.

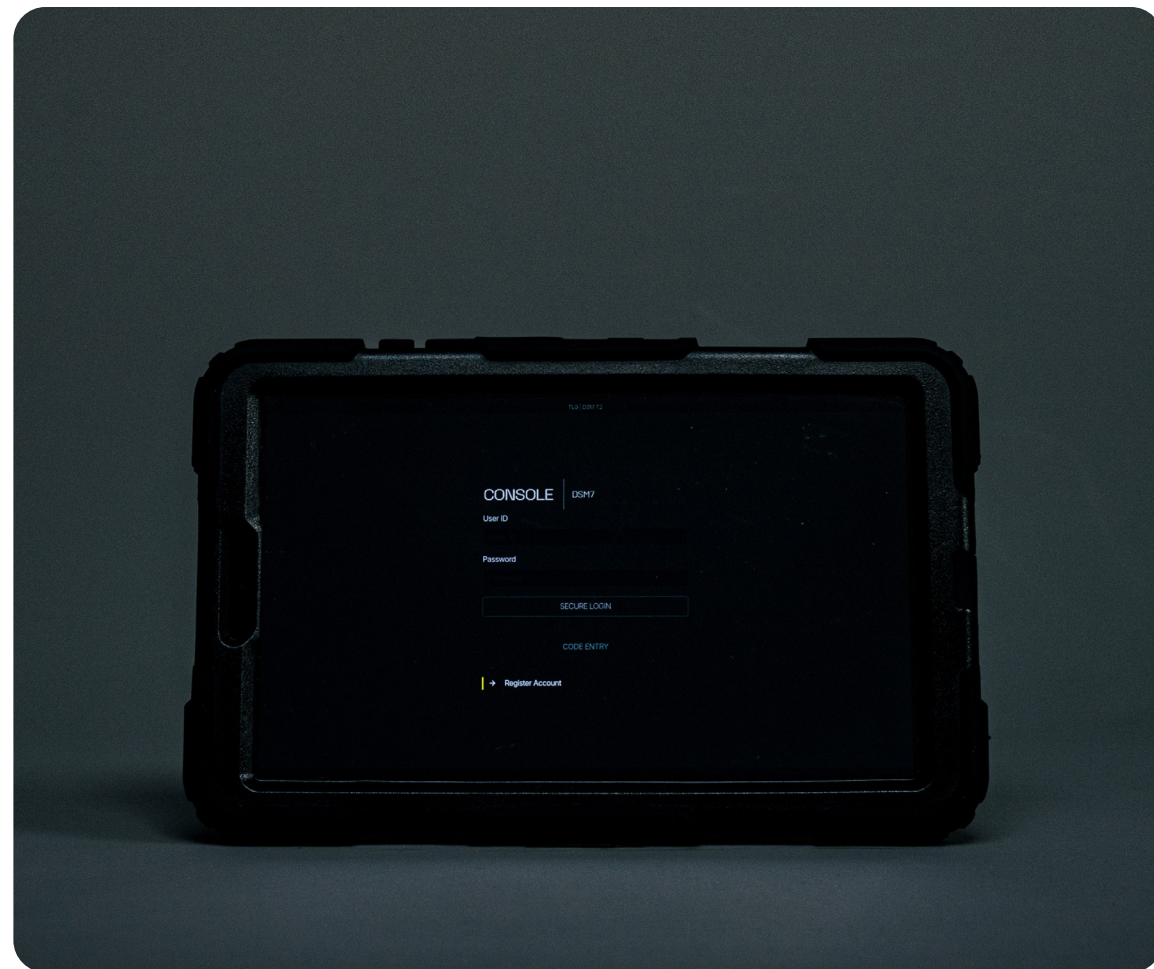

² Virtual Control Centres

One place to plan work, coordinate your team, manage money, automate admin, and see what is happening across your business.

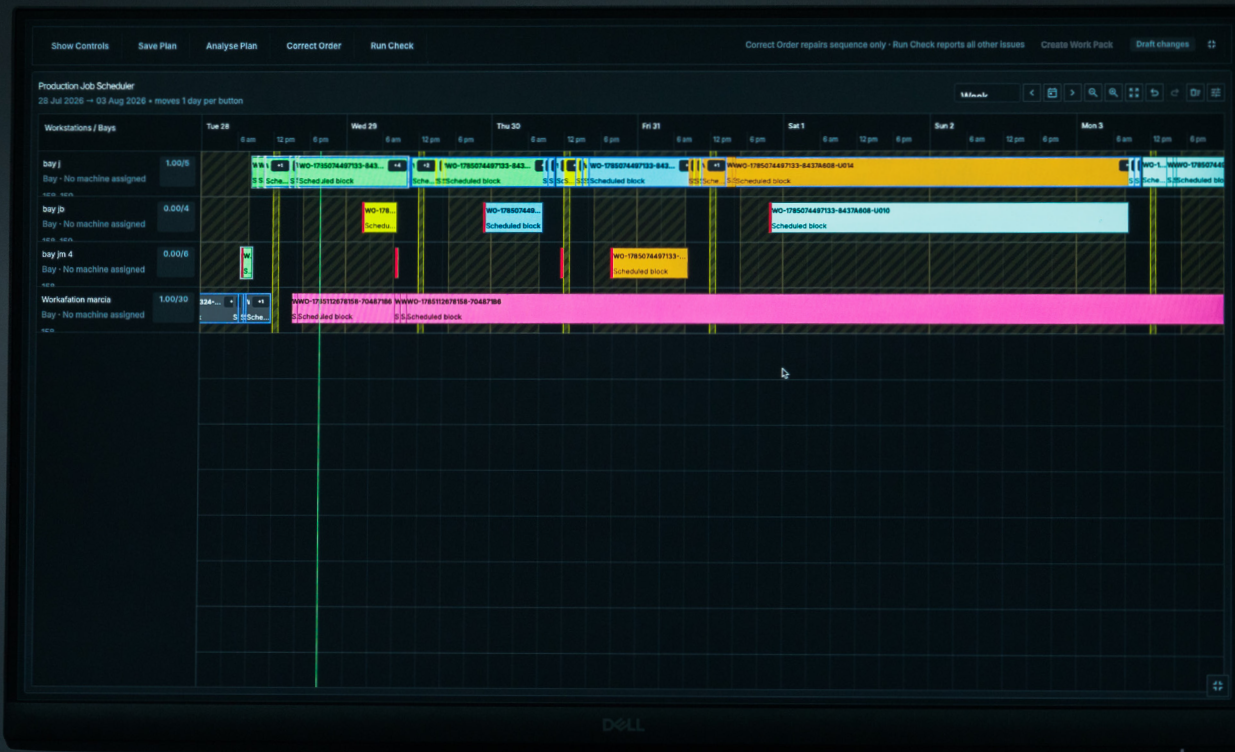

¹ Rugged Handhelds

For task deployment & site-wide communication on our Console Software for the production floor,

² Industrial Tablets

For accessing our Console Software on the production floor, monitoring at home, in-office, or on-the-go

1

Cloud software containing everything you need to run an optimised manufacturing business in a box.

Applied Sciences

Investing in technologies and products that
push the boundaries of the capabilities in
our customer deployed products

¹ We back
exceptional people
and innovations
that address real-
world challenges
and create lasting
economic value.

DSM-7

Decentralised data parsing framework for multimodal computation.

² INF-03

AI compute module designed for high-level inference

⁴ S4 U-CAV

Fast-flight modular multirole UCAV drone.

³ Q-UAV

Heavy-lift multirole Group 2 drone.

¹ Annual Gala Event

Experience our product launches, exhibitions & company updates live and in-person. An opportunity to network with industry leaders and stay up to date.

¹**Family-Value Driven Business**

A performance-driven company with market-leading products, and a home for ambitious individuals who share our standard for achieving at the highest level.

Leading Business
Systems

¹
**Private Client
Services**

Private Client Services is designed for manufacturers whose requirements extend beyond a standard setup. This may include organisations operating across multiple teams or sites, managing complex production workflows, or working with established ERP, MRP and quality systems.

Obsessively designed for the
business people in manufacturing
